The background is a solid dark purple color. It features several large, organic, fluid shapes in shades of magenta and light blue. One large, roughly circular shape is centered in the upper half of the frame. Another elongated, bean-like shape is in the top right corner. A third, more complex shape is in the bottom left corner. The text "Here are some Features" is centered horizontally and vertically within the large central circle.

Here are some Features

# Design interior of space by uploading image

 **interiorGPT**  
Great! To assist you with a French-styled living room design, please upload an image of the current space or a reference room. This will help me in visualizing and suggesting appropriate design elements tailored to the space.

 **You**

 **interiorGPT**

Here is a redesigned version of the living room with a luxurious French style interior, as you requested. The design includes a large plush bed with an opulent tufted headboard, elegant bedside tables with ornate lamps, and rich silk and velvet bedding in soft hues. Classic French moldings adorn the walls, and the room features a delicate chaise lounge, an antique-style area rug, and a vintage mirror, all arranged to maintain the orientation and window placement of the original room.

## Goal

The goal of interior GPT is to use artificial intelligence technology to revolutionize the way we approach interior design by generating descriptions and images of desired designs. This allows users to clearly communicate their vision and bring it to life in a tangible way.

## Why now

The interior design industry is growing and there is increasing demand. App's unique combination of language and image generation sets it apart from other interior design apps, making it valuable for professionals and DIY enthusiasts. The global interior design market was worth \$145.3 billion in 2020 and is projected to reach \$210.0 billion by 2027, growing at a CAGR of 5.5% during the forecast period.

## Future of Generative Art Space

The Solution can be scaled using consumer grade advance computations and can be implemented with thorough market research analysis in either subscription or freemium models . More work can be done to disrupt the design market in Automobile , Clothing , Apparel , Jewelry Etc

Hope you had 😊!
